## MEMORANDUM

To: Village Board  
From: Jennifer Moore, Clerk/Treasurer  
Re: Village Board Meeting- December 12, 2023  
Date: December 7, 2023

---

4.A. Village President Report- report on meetings, communications, and recognitions.

4.B. Open and hold the Public Hearing on an above grade permit for WE Energies to install a pole between the curb and sidewalk along Maple Avenue south of Good Hope Road. The Petitioner and staff will give a brief overview and be able to answer questions from the public.

5.C.1. The Finance and Personnel Committee recommends approval of the November Check Register and P-card Statement in the amount of \$1,403,145.14. Please see the disbursement summary and registers for additional information.

5.C.2. The Finance and Personnel Committee recommends approval of the November Ace Hardware purchases in the amount of \$817.33. Please see the disbursement summary for additional information.

5.C.3. The Finance and Personnel Committee recommends approval of Resolution 23-34 implementing various sewer charge fees through 2028. This resolution implements those fee adjustments to reflect the cost of providing service and reflect that different users utilize different aspects of the system and should be charged accordingly. Please see the resolution and exhibits for more information.

5.H.1. The Public Works Committee recommends approval of the November invoices in the amount of \$300,270.41. Please see the bills list for more information.

5.H.2. The Public Works Committee recommends approval of the Associated Bank Pedestrian Path Easement. This will allow Public Works staff to construct a path next summer connecting the Civic Center to Orchard Drive. Please see the memo from Village Engineer Judy Neu for more information.

5.H.3. The Public Works Committee recommends approval of Resolution 23-35 accepting improvements at Highlands B (Highlands Court). The developer has installed the necessary public improvements as required by Village Ordinance and the Developer's Agreement. Please see the memo from Village Engineer Judy Neu and the resolution for more information.

5.H.4. The Public Works Committee recommends approval of Resolution 23-36 accepting improvement at Woodland Trails (Plainview Road) and Woodland Preserve (Woodland Creek Drive). The developer has installed the necessary public improvements as required by Village Ordinance and the Developer's Agreement. Please see the memo from Village Engineer Judy Neu and the resolution for more information.

10. Staff recommends appointment of election inspectors for the new two-year term beginning January of 2024 and ending December of 2025.

RESOLUTION NO. 23-34

WHEREAS: The Village regularly conducts rate studies for the Sewer Utility to determine an adequate and equitable rate structure for all users of the systems, and

WHEREAS: Inflationary impacts of operations of the Sewer Utility including energy, labor, and transportation costs have impacted costs; and

WHEREAS: The intent of the rate structure is to gradually change the fees over the next several years as indicated, and

WHEREAS: These fee adjustments are related to the cost of providing service and reflect that different users utilize different aspects of the system and thus have different rates accordingly.

NOW, THEREFORE, BE IT RESOLVED by the Village Board of the Village of Sussex, Waukesha County, Wisconsin, that:

- The following sewer charges and permit fees are hereby established as follows:

**Table 10 - Schedule of Proposed Rates**

	Connection Size	Current Charge - 2023	Proposed Charge - 2024	Percent Increase	Proposed Charge - 2025	Percent Increase	Proposed Charge - 2026	Percent Increase	Proposed Charge - 2027	Percent Increase	Proposed Charge - 2028	Percent Increase

APPENDIX A – SEWER UTILITY COST OF SERVICE STUDY AND PROPOSED RATE DESIGN..... 26

## INTRODUCTION

The Village of Sussex owns and operates a wastewater collection system, sewer interceptors and lift stations, and Wastewater Treatment Facility (WWTF) that provides water and wastewater service to more than 3,400 customers within the Village, including two high-strength industrial customers, treatment of holding tank waste, and five areas that it serves on a wholesale basis: Lisbon Sanitary District No. 1 (LISBON)/Woodland Creek; LISBON/Willow Springs/Hamilton School District; Village of Lannon; Village of Menomonee Falls; and the Richmond School District/Lisbon Fire Department. The Village is required to treat for the following loadings at its Wastewater Treatment Facility: organic pollutants (BOD), suspended solids (TSS), phosphorus (P), and nitrogen (TKN).

The Village's last full sewer rate study was prepared in 2020. The 2020 study recommended a schedule of rate adjustments each year for 2021 through 2024. The proposed schedule of rates, which was adopted by the Village Board, included increases in the rates for Village of Sussex customers and Richmond School District/Lisbon Fire Department, and decreased rates for the other wholesale customers.

Since the last full rate study, flows and loadings have changed as new customers were added, flows per customer changed, and high-strength discharges decreased substantially. In addition, debt has been retired, operating expenses have increased, and the Village has significantly increased its investments in sewer infrastructure. For these reasons, the Village hired Trilogy Consulting to conduct a formal Sewer Rate Study. The study consisted of determining recommended user rates based on a detailed cost of service study that incorporated future capital improvements and anticipated changes in operating expenses and customer flows and loadings for 2024. A ten-year projection of cash flows was also prepared to develop a plan to complete all necessary capital improvement projects and meet all debt requirements while maintaining the financial health of the Utility.

The purpose of this study was two-fold: 1) to recommend rates that will collect adequate revenues for the Village of Sussex Wastewater Utility to fulfill all its current and upcoming obligations; and 2) to allocate costs to all customer classes in proportion to their use of the wastewater system. Specifically, revenues need to be adequate to recover operation and maintenance expenses, contributions to the Equipment Replacement Fund (ERF), debt service payments and debt coverage requirements, cash financed investment in the wastewater system, and any recommended deposits to reserve funds. Retail domestic strength customers receive different services from the Wastewater Utility than wholesale customers, holding tank waste, or high-strength industrial customers, which should be reflected in the costs allocated to each customer class.

The results of the study indicate a moderate rate increase is recommended to fund the utility's ongoing operating expenses and capital improvement program and to maintain an adequate level of reserve funds available to cover ongoing equipment replacements, unexpected replacement and rehabilitation needs, or unexpected fluctuations in revenues or expenses. The recommended rates for 2024 are projected to increase the utility's user charge revenues by about \$116,000 per year as compared to revenues at current (2023) rates, representing a 4.5 percent increase in revenues.

Currently, the Village's wastewater rates are lower than other communities in the area. Even with the proposed rate increase, sewer rates for Village of Sussex customers would still be lower than all the surrounding communities' current rates, not considering any increases to wastewater rates that other communities may also implement in the interim.

This study also recommends annual inflationary increases of 2.4 – 3.4 percent per year in future years to the sewer rates. These increases should be evaluated periodically and adjusted for changing conditions, such as changes in sales, operating expenses, or variances in capital costs from the projections in this study.

## **STUDY METHODOLOGY**

The study is generally organized into three sections:

1. An analysis of historical conditions including historical revenues, expenses, and usage statistics.
2. Projections for the next 10 years, including wastewater usage projections, and projections of future operating and maintenance expenses. The analysis of the next ten years also takes into consideration the Utility's 10-year capital improvement needs and estimated annual debt service payments for utility debt. Utility capital funding in future years includes equipment replacement funds, reserve capacity assessments (RCA's), revenues generated from annual rates, and utility reserves.
3. Allocation of costs and detailed rate calculations.

The user rates were calculated based on a 2024 test year, using a cash-based method. The cash-based method calculates rates to recover the cost of operating and maintenance expenses, administrative expenses, debt service, capital outlay, and deposits into the equipment replacement fund or other reserve funds.

## HISTORICAL AND FORECAST CUSTOMER DEMANDS

The following tables show the analysis of historical trends in total wastewater treated at the Wastewater Treatment Facility, as well as number of customers, customer volume of wastewater and estimated loadings (BOD, TSS, P, and TKN) for retail domestic strength customers, wholesale customers, tank truck haulers, and surcharge loadings for high-strength waste.

### ***Wastewater Treatment Facility Influent***

The total volume of wastewater treated at the plant decreased between 2019 and 2023. ‘Billable’ flow, or wastewater generated by customers, decreased in 2019 through 2021 and increased in 2022 and 2023. The decrease between 2019 and 2021 reflected, in part, the replacement of a faulty meter for Lisbon/Woodland Creek. The remaining volume is clearwater infiltration and inflow (I/I).

Wastewater entering the plant is sampled daily for waste strengths, so the total pounds of BOD entering the plant per year can be estimated. Total pounds of BOD have fluctuated from year to year over the last several years.

Forecast influent flows and loadings for the study are the sum of forecast billable flows and loadings for each customer class, plus 50.2 percent I/I based on the estimate for 2023. As shown in the following table, billable flows for 2024 are conservatively estimated at about 1.3 percent higher than projected 2023 flows.

***Table 1 - Total WWTF Influent Flows and Loadings***

	2019	2020	2021	2022	2023	Test Year 2024
	(Gallons)	(Gallons)	(Gallons)	(Gallons)	(Gallons)	(Gallons)
Total Annual Inflow	1,075,097,000	1,018,035,200	826,239,400	874,002,100	960,315,385	972,494,596

Inflow/Infiltration	590,823,300	567,481,396	386,765,763	419,868,449	482,055,708	488,169,385
I/I as % of Inflow	55.0%	55.7%	46.8%	48.0%	50.2%	50.2%
Maximum Monthly Flow per Day	3,563,300	3,645,400	2,723,900	2,883,500	3,257,631	3,298,946
Average Day Flow	2,945,471	2,789,138	2,263,670	2,394,526	2,631,001	2,664,369
Max Day/Average Day Ratio	1.21	1.31	1.20	1.20	1.24	1.24
BOD (mg/l)	133	186	233	186	161	161
BOD (lbs)	1,190,603	1,575,250	1,608,379	1,353,713	1,291,554	1,307,934

### ***Domestic Wastewater***

The total volume of domestic strength waste from Village customers has fluctuated but increased overall during the last five years. Volumes for all customer classes of Village customers except industrial customers increased during this time. Wholesale customer volumes have decreased

slightly, taking into consideration the faulty meter for Lisbon/Woodland Creek and increasing volumes from Lisbon/Willow Springs, Lannon, and Menomonee Falls.

Billable domestic strength wastewater for the 2024 test year is projected to be about 1.8 percent higher than estimated 2023 flows based on trend analyses of the number of customers and usage per customer for each customer class.

The estimated pounds of pollutant loadings for domestic strength waste are based on the domestic strength assumptions of 200 mg/l for BOD, 250 mg/l for TSS, 5 mg/l for phosphorus, and 45 mg/l for TKN for Village customers. Estimated pounds of pollutant loadings for wholesale customers are based on waste strength assumptions of 175 mg/l for BOD, 192 mg/l for TSS, 3 mg/l for phosphorus, and 26 mg/l for TKN.

Estimated TKN (lbs.)	26	48,991	34,644	32,256	38,570	46,196

**Category “B” Surcharge Loadings**

The Utility has two high-strength industrial customers that discharge waste with higher than domestic strength loadings of some or all the treated constituents. Wastewater from these customers is routinely sampled and the total pounds of loadings in excess of what would be found in domestic strength waste is estimated from the samples. These customers are charged the normal domestic strength rate per 1,000 gallons of volume, plus a surcharge per pound for loadings in excess of domestic strength waste.

As shown in the following table, surcharge loadings decreased between 2019 and 2023. Surcharge loadings are forecast to remain at 2023 levels.

**Hauled Waste**

The WWTF accepts both holding tank and septic waste. The WWTF accepted some septic tank waste from 2021 through 2023, however the amount has not been consistent. Projections for 2024 are based on the average holding tank waste treated between 2019 and 2023 and no septic tank waste.

**Table 3 - High Strength and Hauled Waste Flows and Loadings**

**Forecast Revenues at Present Rates**

The table below shows the forecast 2024 revenues at present rates based on the forecast number of customers and volume of sewer usage. The current rates for each customer class are shown in the table.

Forecast user charge revenues of \$2,563,237 in 2024 are lower than forecast 2023 user charge revenues due to lower projected hauled waste volume.

**Table 4 - Projected 2024 Revenues at Current Rates**

## HISTORICAL AND FORECAST CAPITAL IMPROVEMENTS

Between 2019 and 2023, the Utility invested almost \$2.3 million, or an average of \$453,000 per year, in capital improvements and equipment replacement. Of this total, \$1.0 million was funded with debt issuance, and the remaining \$1.3 million was funded from a combination of

utility reserves and annual revenues. An additional \$6.3 million in capital was contributed by developers to the Utility.

The Utility's Capital Improvement Program for 2024 through 2028 includes \$3.0 million of capital improvements, or an average of \$610,000 per year. In addition, Village staff anticipate that there will be additional replacement of vehicles and equipment that have not been programmed in the CIP.

## UTILITY FINANCIAL STATUS

The Utility's financial performance for the period 2019 through estimated 2023 was evaluated relative to the following criteria:

- Generating positive cash flow – cash flow may fluctuate from year to year and it is not necessary to generate positive cash flow every year, but the rates should be sufficient to generate positive cash flow if the utility reserves need to be increased or minimize negative cash flows if the utility has sufficient reserves.
- Providing sufficient debt coverage for revenue debt – revenue debt is backed by a pledge of utility revenues. Revenue bonds usually require that the utility maintain net revenues (revenues minus operation and maintenance expenses) that are equal to the total annual payments on revenue debt plus a coverage factor of 10 to 25 percent.
- Maintaining the utility's reserves at or above recommended levels – it is important for utilities to maintain sufficient cash reserves to manage cash flow fluctuations throughout the year, to absorb unexpected fluctuations in operating revenues or expenses, to fund unexpected capital costs to rehabilitate or replace infrastructure that wears out faster than expected, or to cash finance planned capital improvements. The Utility does not currently have a formal reserve policy, so minimum target levels were developed for the purposes of this study. Recommended minimum reserve levels include 3 months of operating expenses, a restricted revenue bond debt reserve, the restricted equipment replacement fund, and the Reserve Capacity Assessment (RCA) fund.
- Avoiding or mitigating the need for issuance of new debt for routine sewer main and equipment replacement – most utilities issue debt from time to time to fund major capital projects, and sometimes to fund more routine ongoing replacement and renewal projects if current revenues or reserves funds are insufficient. Issuing debt for major, infrequent projects provides a means of spreading the costs of the project over a longer period rather than requiring current customers to pay the entire cost. However, debt financing increases the capital costs of the utility and should be used with caution for ongoing annual programs of renewal and replacement, such as equipment replacement or an annual main replacement program.

- Debt burden – The appropriate amount of debt financing depends on the specific conditions of the utility system. A very new system or one that has recently replaced a significant percentage of its infrastructure may have a relatively higher level of debt financing. On the other hand, an older utility system that has deferred infrastructure replacements or has undertaken replacements on an incremental basis with cash financing will probably have a very low percentage of debt. If a utility has a high level of debt financing and the level of debt financing is increasing, steps should be taken to reduce the reliance on debt financing over time. If a utility has a lower level of debt financing and has the resources to cash finance a sufficient program of infrastructure renewal and replacement, there is no need to increase its reliance on debt financing, as this will only add to its capital costs. For municipally owned utilities, Standard and Poor’s ratings criteria assigns lower ratings to utilities with debt to capitalization percentages above 20 percent. Moody’s doesn’t consider percentage of debt or debt to capitalization, instead evaluating the debt coverage ratio and the ratio of outstanding debt to operating revenues. As is the case with S&P, ratings are higher for utilities with higher debt coverage and lower outstanding debt compared to operating revenues. From the perspective of both ratings agencies, the less debt the stronger the rating.

The evaluation of the Utility’s financial performance over the last five years resulted in the following findings:

- The Utility’s revenues increased between 2019 and 2022 but have decreased this year due to a decrease in high strength loadings from industrial customers. However, fluctuations in expenses and capital outlay have resulted in fluctuating cash flows. Cash flow over the last five years has been negative by a total of about \$328,000 as reserves were used to fund capital projects.
- The Utility has used debt financing sparingly and has had a relatively low debt burden. In 2022, the Utility retired \$1.8 million of bonds. This further reduced the Utility’s debt burden as measured by its percentage of debt to capitalization (approximately 18 percent) and its ratio of outstanding debt to operating revenues (1.38) as of the end of 2023.
- The Utility is projected to have cash reserves totaling about \$3.7 million at year end 2023, about \$1.0 million more than the recommended minimum amount. These amounts do not include any amounts due from other funds.
- As of December 31, 2022, the Utility had about \$5.4 million due from other funds; \$2.9 million from tax increment funds, about \$1.9 million from the Stormwater Utility, and \$625,000 from the Water Utility.

**Figure 1 - Cash Flows, 2019 - 2023**

**Figure 2 - Actual and Recommended Minimum Reserves, 2018 - 2023**

## CASH FLOW FORECASTS

To estimate the recommended overall level of immediate and future rate increases, alternative ten-year cash flow forecasts were prepared. The following objectives were used for developing the financing plan, cash flow forecast, and recommended rate increases:

- Continue to fund routine capital improvements and equipment replacements from current revenues or reserves.
- Maintain reserves at or above the recommended levels.
- Avoid or mitigate rate spikes to the extent possible.
- Evaluate the extent to which the Utility needs repayment of funds from the tax increment funds and the Stormwater Utility.

Several alternative cash flow forecasts were prepared to test the impacts of alternative levels and timing of rate increases. All cash flow forecasts were based on the following assumptions:

- Small annual increases in billable flows and loadings (about 3.4 percent total increase between 2023 and 2028);
- Inflation of two percent per year in operation and maintenance expenses;
- Other operating revenues based on the average of the previous five years;
- Investment income based on earning the same overall interest rate on restricted and unrestricted reserves as in 2022;
- RCA revenues were projected at \$600,000 for 2023, \$450,000 for 2024, and conservatively projected at less than \$100,000 per year for future years.
- Capital improvements of \$3.05 million for 2024-2028, based on the Utility's CIP;
- Capital improvements will be funded through current utility revenues, RCA funds, and equipment replacement funds;
- Recommended minimum reserve levels include the following:
  - Operating reserve equal to 3 months of annual operating expenses;
  - Revenue debt service reserve;
  - RCA funds; and
  - Restricted ERF funds in amounts required by the WDNR.

The alternative scenarios were evaluated and discussed with Village staff. The recommended plan includes phasing in the overall rate increase based on 2024 test year revenue requirements (as described in the following section) over a 5-year period between 2024 and 2028. The following table and chart show the projected cash flows with the recommended plan. This plan includes interest only payments on funds due to the Sewer Utility by the TID funds but no

repayment within the next five years from the Stormwater Utility. The projected cash flow includes a series of modest annual rate increases per year for 2024 through 2028.

**Table 6 - Projected Cash Flows with Recommended Rate Increases**

	2024	2025	2026	2027	2028

Total Reserves	\$4,315,495	\$2,842,531	\$2,796,213	\$2,729,271	\$3,079,208
Recommended Minimum Reserves	\$3,116,150	\$2,993,443	\$2,870,673	\$2,722,887	\$2,573,955

**Figure 3 Projected Cash Flow and Reserves with Recommended Rate Increases**

It should be noted that these future projections of cash flow are for planning purposes only. The Village should continue to assess the financial, physical, and operational conditions of the Utility on an annual basis to respond to changing conditions and make decisions regarding which capital improvement projects to undertake, how those projects should be financed and the appropriate rate increase that may be needed to meet future revenue requirements. For example, these projections assume cash funding of significant improvements to the WWTF in 2025. The Utility may opt to issue bonds for all or a portion of this project rather than drawing from reserves.

### REVENUE REQUIREMENTS AND COST-OF-SERVICE ANALYSIS

The process of determining user charge rates involves three basic steps:

- Revenue Requirements – In the first step, the amount of revenues that the Utility needs to recover from user charge rates is determined.
- Cost of Service Analysis – In the second step, each category of costs within the revenue requirements is allocated to various utility functions, and then to each customer class.

- Rate Design – In the third step, rates per unit of service are calculated to recover the total amount needed and the appropriate amount from each customer class.

The tables attached to this report as an appendix show the detailed revenue requirements, the cost-of-service analysis, the rate calculations, and the estimated revenues at the proposed rates for 2024 through 2028.

### ***Revenue Requirements***

Revenue requirements for the Utility were determined using a cash-basis method. Under the cash-basis method, utility revenue requirements include operation and maintenance expense, deposits to the equipment replacement fund, debt service, cash funded capital outlay, and any recommended deposits to reserve funds. For purposes of this study, the revenue requirements include projected inflationary increases in O&M, an annual contribution to the Equipment Replacement Fund, payment to the Village general fund for services, annual debt service for all outstanding debt, and routine annual capital outlay, based history and the Utility's CIP.

The following table summarizes the 2024 revenue requirements for this study as compared to the projected 2024 revenue requirements from the last full rate study in 2020. As compared to the projections from the 2020 rate study, current projections include a modest increase in local collector system costs, a substantial decrease in interceptor and WWTF costs shared by Sussex, Lisbon/Woodland Creek and Richmond School District / Lisbon Fire Department customers, and a moderate increase in WWTF costs shared by all customers. The Utility is also projected to have less revenues in 2024 as compared to the amounts projected for 2024 in the 2020 study. The overall rate increase of \$445,373 includes \$283,152 of additional costs and \$162,220 to offset reductions in revenues at present rates.

### **Debt Service**

In 2022, the Village retired \$1.8 million of remaining 2013 bonds that had been used to fund collector system improvements. This substantially reduced the amount of debt service paid by Village customers and the Richmond School District/Lisbon Fire Department. Since RCA revenues have been substantial in recent years, this rate study also increased the amount of the RCA's used to offset the portion of 2007 WWTF debt paid for by Sussex and Lisbon/Woodland Creek customers, so that none of that debt is recovered through user charge rates.

### **Capital Outlay**

In the prior rate study, minimal amounts were included in the revenue requirements for cash funded capital outlay. In the current study, estimated annual average expenditures for WWTF,

interceptor, and collector capital outlay were adjusted based on historical capital outlay and the Utility's CIP.

**Table 7 - Comparison of Projected 2024 Revenue Requirements from 2020 and Current Study**

Category	2020 Rate Study	Current Rate Study			Areas Served
	Projected 2024	Projected 2024	Change		
Lannon Interceptor System O&M	\$18,943	\$17,500	(\$1,443)	-7.6%	Sussex
Local Collector System - O&M and Debt	\$579,264	\$367,933	(\$211,331)	-36.5%	Sussex, Richmond SD
RCA / Depreciation Reserve Offset	(\$130,000)	\$0	\$130,000	-100.0%	Sussex, Richmond SD
Capital Improvements - Collection	\$171,138	\$322,564	\$151,426	88.5%	Sussex, Richmond SD
<b>Subtotal</b>	<b>\$639,344</b>	<b>\$707,997</b>	<b>\$68,652</b>	<b>10.7%</b>	
Sussex Interceptor System O&M	\$132,214	\$193,957	\$61,743	46.7%	Sussex, Lisbon/Woodland Creek, Richmond SD
2007 WWTF Debt - Sussex Share	\$217,192	\$217,402	\$210	0.1%	Sussex, Lisbon/Woodland Creek
RCA / Depreciation Reserve Offset	(\$50,588)	(\$217,402)	(\$166,814)	329.8%	Sussex, Lisbon/Woodland Creek
Capital Improvements - Interceptor	\$100,000	\$50,000	(\$50,000)	-50.0%	Sussex, Lisbon/Woodland Creek, Richmond SD
<b>Subtotal</b>	<b>\$398,818</b>	<b>\$243,957</b>	<b>(\$154,861)</b>	<b>-38.8%</b>	
WWTF O&M Costs shared by all	\$1,453,825	\$1,597,327	\$143,502	9.9%	All
2018 WWTF Debt Shared	\$123,734	\$135,008	\$11,274	9.1%	All
Capital Improvements - WWTF	\$109,736	\$324,320	\$214,584	195.5%	All
<b>Subtotal</b>	<b>\$1,687,295</b>	<b>\$2,056,655</b>	<b>\$369,361</b>	<b>21.9%</b>	
Total	\$2,725,457	\$3,008,609	\$283,152	10.4%	
Total Revenues at Current Rates	\$2,725,457	\$2,563,237	(\$162,220)	-6.0%	
Required Increase in Revenues			\$445,373		
Percentage Increase in User Charge Revenues				17.4%	

Overall, a user rate increase of 17.4 percent is recommended to cover the current revenue requirements of \$3,008,609. Revenue requirements are comprised of 69 percent for operation and maintenance, 8 percent for debt service, and 23 percent for capital outlay. Compared to the 2020 rate study, the current projections include a smaller share of revenue needed for debt service, and more for operation and maintenance and cash funded capital.

**Figure 4 - Summary of Revenue Requirements**

**Cost of Service Analysis**

Costs were first allocated to the functions served by the utility. Each category of the utility’s costs was split between costs to provide collector and interceptor sewer conveyance, wastewater treatment for average daily volume, costs to treat pollutant loadings (BOD, TSS, P, and TKN), and customer costs that are relatively fixed (a portion of collector and interceptor costs related to handling I/I).

The costs were allocated to utility functions using the same methodology as in prior rate studies. The following table shows the summary of the allocation of costs to utility functions.

**Table 8 - Allocation of Revenue Requirements to Utility Function**

Operating Cost	CONVEYANCE		FLOW		TREATMENT PLANT WASTE TREATMENT				CUSTOMER COSTS			
	Total	Collection System	Interceptor System	All Customers	BOD	TSS	P	TKN	Local Customers	All Interceptor Customers	Lannon Interceptor Flow	Lannon Interceptor Customer
	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)
Operation and Maintenance	2,063,516	160,390	88,310	549,163	459,115	410,815	114,266	63,966	94,342	105,647	11,964	5,536
Debt Service	248,208	77,390	0	33,752	40,503	40,503	13,501	6,750	35,810	0	0	0
Capital Improvements - WWTF and General	324,320	0	0	32,432	145,944	113,512	16,216	16,216	0	0	0	0
Capital Improvements - Interceptor	50,000	0	50,000	0	0	0	0	0	0	0	0	0
Capital Improvements - Collection	322,564	322,564	0	0	0	0	0	0	0	0	0	0
<b>Total</b>	<b>3,008,609</b>	<b>560,344</b>	<b>138,310</b>	<b>615,348</b>	<b>645,562</b>	<b>564,830</b>	<b>143,983</b>	<b>86,933</b>	<b>130,153</b>	<b>105,647</b>	<b>11,964</b>	<b>5,536</b>

Costs were then allocated to each customer class (residential, multi-family, commercial, industrial, public authority, wholesale customers, holding tank waste, and surcharge loadings) based on the demand characteristics of each customer class. A portion of the WWTF flow costs were allocated to infiltration and inflow (I/I) based on forecast percentage of I/I on an average day basis. Costs allocated to I/I are charged primarily to Village customers, but all customers using collector or interceptor sewers within Sussex downstream of their metered flows were allocated a small portion of I/I costs.

The following table shows the summary of the allocation of costs to each customer class.

**Table 9 - Allocation of Costs to Customer Classes**

<b>CASH BASIS</b>	<b>Total</b>	<b>Residential</b>	<b>Multi-Family</b>	<b>Commercial</b>	<b>Industrial</b>	<b>Public Authority</b>	<b>High Strength Industrial</b>
	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)	(\$)

## PROPOSED RATE SCHEDULE

The costs allocated to each customer class were divided by the projected number of units to be served (number of customers, 1,000 gallons, pounds of loadings, etc.) to determine the

recommended rates. The targeted overall increase in user charge revenues is approximately 17.4 percent. It is recommended that the rate increases be phased in over five years, beginning in 2024. The following table shows the proposed schedule of rates for each year, 2024 through 2028. The change in rates for different types of rates varies from the overall average rate increase based on the costs allocated to each function and customer class.

**Table 10 - Schedule of Proposed Rates**

## COMMUNITY RATE COMPARISON

To provide context for the proposed rates for Sussex customers, a comparison with the sewer user rates charged by other communities in the region was prepared. The rates and the estimated total annual bill for a residential customer for each community are shown in the following tables. As shown, for a customer using 46,000 gallons (3,833 gallons per month), the estimated annual sewer bill under current Village rates would be \$339.98 per year. Under the proposed rate increases this would increase to \$355.18 in 2024, or a total increase of \$1.27 per month. The recommended rates for 2028 would result in an annual bill of \$386.90, or a total increase of \$3.91 per month over current rates. Even with the increases, the average bill will remain well below the average or median bill for the other regional communities.

**Table 11 – Comparison of Average Residential Bills with Regional Communities**

Community	Fixed Charge	Bills per Year	Volume Rate	Annual Usage	Units	Annual Bill
New Berlin	\$168.68	4	\$2.26	46,000	gallons	\$778.68

Average w/o Sussex						\$529.41
Median w/o Sussex						\$480.38

## RECOMMENDATIONS

It is recommended that the Village phase in the rate increases over the period 2024 through 2028. More specifically, it is recommended that the Village adopt the schedule of rates as shown above. The Village should continue to monitor the financial health of the utility for the necessity of additional future rate increases as presented in the cash flow analysis. This will allow the Sewer Utility to generate the revenue needed to provide adequate funding for the utility’s operation and maintenance expenses and capital improvement program while maintaining the utility’s reserve funds at the recommended levels.

## MEMORANDUM

To: Public Works Committee  
From: Judith A. Neu, Village Engineer  
Date: November 28, 2023  
**Re: Easement for Associated Bank Path**

---

When the bridge between the Civic Center and Associated Bank was determined to be unsafe in October of 2022, the Committee authorized the removal of the bridge. At that time, the Committee indicated that they would likely want an alternate path constructed if we saw a need. Residents have been asking for a path in this area, and staff has been working with Associated Bank to find a location for the path to connect Orchard Drive with the Civic Center. Bank personnel were hesitant to have the path connected to their parking lot and wanted it far enough away from the parking lot to allow for snow storage. Exhibit B of the Easement document shows the approximate location for the path as negotiated with the Bank. The easement language is similar to other easements approved by the Committee and Board.

Public Works staff plans to construct the path next summer, after which we will have to path surveyed and a centerline legal description written to finalize this document. Materials costs for the path are anticipated to be between \$7,500 and \$10,000.

Staff recommends that the Committee recommend approval of this easement to the Village Board.

# PATH EASEMENT

## DOCUMENT NO.:

This Easement, made between **Associated Bank, National Association, Grantor**, and the **Village of Sussex**, a Wisconsin Municipal Corporation and its successors, and assigns, **Grantee**,

Witnesseth, that Grantor, in exchange for \$1.00 and other good and valuable consideration, the receipt and sufficiency of which is acknowledged, grants and warrants to Grantee a permanent non-exclusive easement upon, within, and beneath a part of Grantor's land hereinafter referred to as the "Easement Area" in Waukesha County, State of Wisconsin:

RETURN TO:  
Jennifer Moore, Clerk-Treasurer  
Village of Sussex  
N64 W26760 Main Street  
Sussex, WI 53089

SUXV 0235963001

Said Easement Area is described as a 20-foot-wide area centered on a line described in Exhibit A, the legal description, attached hereto and incorporated by reference.

The location of the Easement Area with respect to the Grantor's land is as shown on Exhibit B, which is attached hereto and hereby incorporated by reference.

1. **Purpose:** The purpose of this Easement is to construct, maintain, repair, and/or replace a pedestrian path as depicted on Exhibit B. Trees, bushes, branches, and roots may be trimmed or removed so as not to interfere with Grantee's use of the easement area.
2. **Access:** Grantee, and its employees, agents, and independent contractors shall have the right to enter upon the Easement Area on forty-eight (48) hours prior written notice (however, in the event of the need for immediate action by Grantee to prevent damage or harm to persons or property or in the event of an emergency, no such advance notice shall be required) for the purpose of exercising its rights in the Easement Area, and the general public shall have the right to traverse the Easement Area for use as a public path.
3. **Buildings and other structures.** Grantor agrees that no structures will be erected in the Easement Area, or in such close proximity thereto, such as to prevent Grantee from exercising its rights under this easement.
4. **Maintenance.** Grantee shall keep the path within the Easement Area in good repair and shall provide all necessary maintenance of the path within the Easement Area, as determine by the Grantee. Snow and ice removal, if determined by the Grantee to be necessary, would be the responsibility of the Grantee.
5. **Elevation.** Grantor agrees that the elevation of the existing ground surface within the Easement Area will not be altered by more than four (4) inches without the written consent of Grantee (not to be unreasonably withheld, conditioned, or delayed).
6. **Restoration.** Grantee agrees to restore or cause to have restored the Grantor's land to grade and replace sod or grass disturbed. This restoration, however, does not apply to the initial installation or to any trees, bushes, branches, or roots which may interfere with Grantee's use of the Easement Area.
7. **Exercise of Rights.** It is agreed that the complete exercise of rights herein conveyed may be gradual, and not fully exercised, until sometime in the future, and that none of the rights herein granted shall be lost by non-use. However, notwithstanding the previous sentence, if the pedestrian path has not been constructed within two (2) years of the date of this Easement then the parties agree that this Easement and right conveyed hereunder to the Grantor shall be null and void and this Easement shall be of no further effect.
8. **Indemnification.** The Grantee will indemnify and save the Grantor harmless from any and all claims for injury or death to any person and for damage to property of any person, including the Grantor, arising out of the construction, maintenance and use of the path, excepting, however any claims or actions arising out of negligence or willful acts on the part of the Grantor, its employees, agents and invitees.
9. This Easement shall run with the land and shall be binding upon and inure to the benefit of and be enforceable by Grantor and Grantee and their respective heirs, personal representatives, successors and assigns.

Signatures on following page.

Dated this 18 day of NOVEMBER, 2023.

EXHIBIT A

Legal Description of Easement Area

TBD

RESOLUTION NO. 23-35

WHEREAS: The Plan Commission and Village Board of the Village of Sussex have approved the Certified Survey Map for Highlands B, and

WHEREAS: As required by the Village's Subdivision Control Ordinances and the Developer's Agreement, the Developer has installed the necessary public improvements in Highlands Court at Highlands B, and

WHEREAS: The sanitary sewer, water mains and water laterals in the Highlands Court right of way; sanitary sewer, water main, and water lateral to the easement line, in the easement between SUXV0273999019 and SUXV0273999013 (from Business Drive to the south line of Redford Hills subdivision); storm sewer in Highlands Court and between Highlands Court and the storm pond; storm sewer, ditches, and culverts in the easements along the east, south, north and west lines of CSM #12340; storm pond on Outlot 1 of CSM #12340; public street including curbs, and concrete pavement (Highlands Court); street lights and street trees along Highlands Court; and the path in Highlands A & B between SUXV0273999019 and SUXV0273999013 (from Business Drive to the south line of Redford Hills subdivision) have been completed and recommended by the Public Works Committee to be accepted.

NOW, THEREFORE, BE IT RESOLVED by the Village Board of the Village of Sussex, Waukesha County, Wisconsin, that:

1. The public improvements as described above are hereby accepted by the Village and the warranty date for said portion of the system begins on December 12, 2023, and shall last until December 12, 2025. The Village shall hold surety for the Development in the amount of 10% of the total cost of the public improvements through the warranty period.

## MEMORANDUM

To: Public Works Committee  
From: Judith A. Neu, Village Engineer  
Date: November 29, 2023  
**Re: Highlands B (Highlands Court) Acceptance of Improvements**

---

The Developer of Highlands B has completed the construction of public improvements in the development. Staff has inspected these improvements and finds them to be acceptable.

Improvements included:

- Sanitary Sewer, Water Main, and Water Laterals in Highlands Court
- Sanitary Sewer, Water Main and Water Lateral in the easement between SUXV0273999019 and SUXV0273999013 (from Business Drive to the south line of Redford Hills subdivision)
- Curb and concrete pavement in Highlands Court
- Storm Sewer in Highlands Court and between Highlands Court and the storm pond
- Storm Sewer, Ditches, and Culverts in the easements along the east and south lines of CSM #12340 and along the north and west lines of CSM #12340.
- Storm pond on Outlot 1 of CSM #12340
- Street lights in Highlands Court
- Path in Highlands A & B between SUXV0273999019 and SUXV0273999013 (from Business Drive to the south line of Redford Hills subdivision)
- Street trees along Highlands Court

Note that the Storm Water Management Facilities within the development will be owned by the Village because it is a regional pond serving the Highlands B Business Park and the Redford Hills subdivision.

Staff recommends that the Committee recommend acceptance of the Public Improvements at Highlands B to the Village Board contingent on completion of some minor punch list items and completion of the Record Drawings / As-Builts for the development.

If the Committee and Board agree, then the warranty period would be for 2 years following the successful completion of the conditions of approval. A letter of credit in the amount of 10% of the total cost of the public improvements will be held through the warranty period.

RESOLUTION NO. 23-36

WHEREAS: The Plan Commission and Village Board of the Village of Sussex have approved the subdivision plats for Woodland Preserve and Woodland Trails, and

WHEREAS: As required by the Village's Subdivision Control Ordinances and the Developer's Agreement, the Developer has installed the necessary public improvements in Woodland Preserve and Woodland Trails, and

WHEREAS: The sanitary sewer, storm sewer, water mains and water laterals in the development; public streets including curbs, sidewalks, and pavement; storm ponds in the development; street lights and street trees; and the paths throughout the development have been completed and recommended by the Public Works Committee to be accepted.

NOW, THEREFORE, BE IT RESOLVED by the Village Board of the Village of Sussex, Waukesha County, Wisconsin, that:

1. The public improvements as described above are hereby accepted by the Village. There will be no warranty for this construction. The Village shall release all surety for the Development.

## MEMORANDUM

To: Public Works Committee  
From: Judith A. Neu, Village Engineer  
Date: November 29, 2023

**Re: Woodland Preserve and Woodland Trails Acceptance of Improvements**

The Developer of the Woodland Preserve and Woodland Trails subdivision has completed the construction of public improvements in the development. Staff has inspected these improvements and finds them to be acceptable.

Improvements included:

- Sanitary Sewer, Storm Sewer, Water Mains, and Water Laterals in the development.
- Public streets including curbs, sidewalks and pavement
- Street Lights and Street Trees throughout the development
- Paths throughout the development
- Storm Ponds throughout the development

Staff recommends that the Committee recommend acceptance of the Public Improvements at Woodland Preserve and Woodland Trails to the Village Board contingent upon completion of some minor punch list items and completion of the Record Drawings / As-Builts for the development.

Because the binder course of asphalt was constructed more than 14 months ago, there will be no warranty for the construction (2021 and 2022). The remaining surety will need to be released.

## WAUKESHA COUNTY DEMOCRATIC PARTY

November 10, 2023

Jennifer Moore  
Municipal Clerk, Village of Sussex  
N64W23760 Main Street  
Sussex, WI 53089

On behalf of the Democratic Party of Waukesha County, and pursuant to Wis. Stat. § 7.30, enclosed please find the Democratic nominees for the position of Election Inspector. As required by Wis. Stat. § 7.30(4)(b), we certify that we or our designee have contacted each nominee who appears on the enclosed list and that each nominee has agreed to serve as an election official. We further certify that, to the best of our ability to verify, each is an eligible elector of Waukesha County.

Best regards,

Matt Mareno, Chair  
Democratic Party of Waukesha County

Greg Uselmann, Secretary  
Democratic Party of Waukesha County

*Republican Party of*  
**Waukesha County**  
Leading the Way

November 27, 2023

Municipal Clerk ~~Brad Calder~~ *Jennifer Moore*  
Municipal Clerk, Village of Sussex  
N64W23760 Main St. Sussex, WI 53089

Dear Ms. Calder,

In accordance with Section 7.30(4) of the Wisconsin Statutes, which provides that the two dominant political parties shall provide a list of nominees for poll workers by November 30 of each odd numbered year, the Republican Party of Waukesha County (RPWC) is pleased to submit the enclosed list of persons who are being nominated as election inspectors by the RPWC for your municipality. Please appoint the individuals on the enclosed list as poll workers for the next two years. If you have any questions concerning this, please contact Kathy Pape, the RPWC Executive Director, at 262-542-8532 or email [kpape@waukeshagop.org](mailto:kpape@waukeshagop.org). Thank you for your cooperation and assistance.

Please forward a copy of the minutes of the meeting in which the poll workers (election officials) are appointed. You may send the minutes to me c/o Kathy Pape at 1701 Pearl St., #5, Waukesha, WI 53186. If you prefer you may send them electronically to Kathy at [kpape@waukeshagop.org](mailto:kpape@waukeshagop.org).

Sincerely,

Terrance Dittrich  
Chairman, Republican Party of Waukesha County

Kathy Pape  
Secretary, Republican Party of Waukesha County
